

# Xplor Home App

The Kids Cottage currently uses digital sign in/out system called Xplor Office.

## What is it?

This will replace our current sign in/out functionality. It will be similar to the kiosk and it is utilised in the reception/foyer allowing you to sign in and out your children **contactless** with a QR Code scanner from your phone or using a phone number and PIN code.

Our educators will also now be recording your child's observations and health digitally, and you will be able to access these observations live throughout the day via the Xplor Home App.

## How will this work?

1. You will be invited via email to set up your account for Xplor. Please keep an eye out for this email and create your password (please note this could be in your Junk folder).
2. Once you have set up your account online, please download the mobile app called '[Xplor Home](#)' and log in. This will allow you to sign in your child with the QR Code scanner.
3. If you prefer to sign in and out with your mobile and pin, create an [Xplor ID](#) from your welcome e-mail (it will ask if you want to merge profiles, you need to press yes on this).

If you have any questions, feel free to contact the centre. Our email is [info@kidscottagemiddleharbour.com](mailto:info@kidscottagemiddleharbour.com)
